Hinge Locations Options

Select the corresponding circles on the side view for preferred zippered hinge locations. Please see **"IMPORTANT"** information on hinge width below.

Note: RoamRest's standard hinge placements: **Top** between panels A & B, and **Bottom** between panels B & C.

Note: The right cutout on Panel A is standard to the MOAB platform when platform is fully extended. If you need different cutout dimensions, please cross out the incorrect dimensions and write in the correct dimensions.

IMPORTANT:

- 1) Each hinge adds a 1/2" to the total length of the mattress. To account for this, a 1/2" will be taken off each panel B and C for a total of 1" for mattress fitment accuracy.
 - 2) A fee of **\$300** will be applied for custom design process.
- NOTE:** all custom material costs not included in fee.
